Application for Team Lead / Senior Full Stack Developer

Dear Hiring Manager,

With 8 years of experience in software engineering, I have designed and delivered production systems across full-stack development, blockchain and Web3, AI automation, trading platforms, and enterprise commerce. I am writing to express my interest in a Team Lead or Senior Full Stack Developer role where I can combine hands-on engineering with team leadership, client communication, and end-to-end delivery ownership.

In my current role as Team Lead - Full Stack Developer at Maticz Technologies, I lead development for the GreenEx India cryptocurrency trading platform and coordinate technical execution across the team. My work includes futures trading workflows, Risk Management System modules for pre-trade validation and exposure controls, U2P order matching, TradingView and broker API integrations, real-time services, and VAPT security remediation. I also manage client calls, clarify requirements, communicate progress, resolve delivery concerns, and help ensure commitments reach production on time.

Previously, I led delivery of complex products at Pixel Web Solutions, including cryptocurrency exchanges, NFT marketplaces, ICO/IEO platforms, custom crypto payment gateways, and a MetaMask-like browser extension. I have also built universal wallet connectivity for major wallets and multi-chain environments, and developed enterprise e-commerce platforms with payment integrations and high-concurrency requirements.

My technology experience spans Next.js, React.js, Node.js, Express.js, Python FastAPI, Laravel, PHP, MongoDB, MySQL, PostgreSQL, WebSockets, REST APIs, Ethers.js, Web3.js, WalletConnect, smart contracts, AWS, Git, Docker, and Kubernetes. I also use n8n with Claude, ChatGPT, and Gemini to build AI-powered automation workflows that have reduced manual business processes by 70%.

Beyond implementation, I lead knowledge-transfer sessions on Next.js, AI agents, n8n, Web3, ICO/IEO, and NFT concepts. I support developers through planning and review, represent technical progress in client discussions, and keep delivery aligned with business priorities. I value clear architecture, dependable communication, and the discipline to carry work from design through deployment and maintenance.

I would welcome the opportunity to discuss how my experience can help your team build reliable, high-impact products. Thank you for your time and consideration.

Warm regards,

T. Ramachandran

Team Lead & Senior Full Stack Developer

Web3 & Blockchain Specialist

EDUCATION

MCA (Master of Computer Applications) — Thiagarajar Engineering College, Madurai (2015 - 2018)

B.Sc Computer Science — The American College, Madurai (2012 - 2015)
